Hilt — implemented MongoDB schema
Current checkout · 9 November 2026

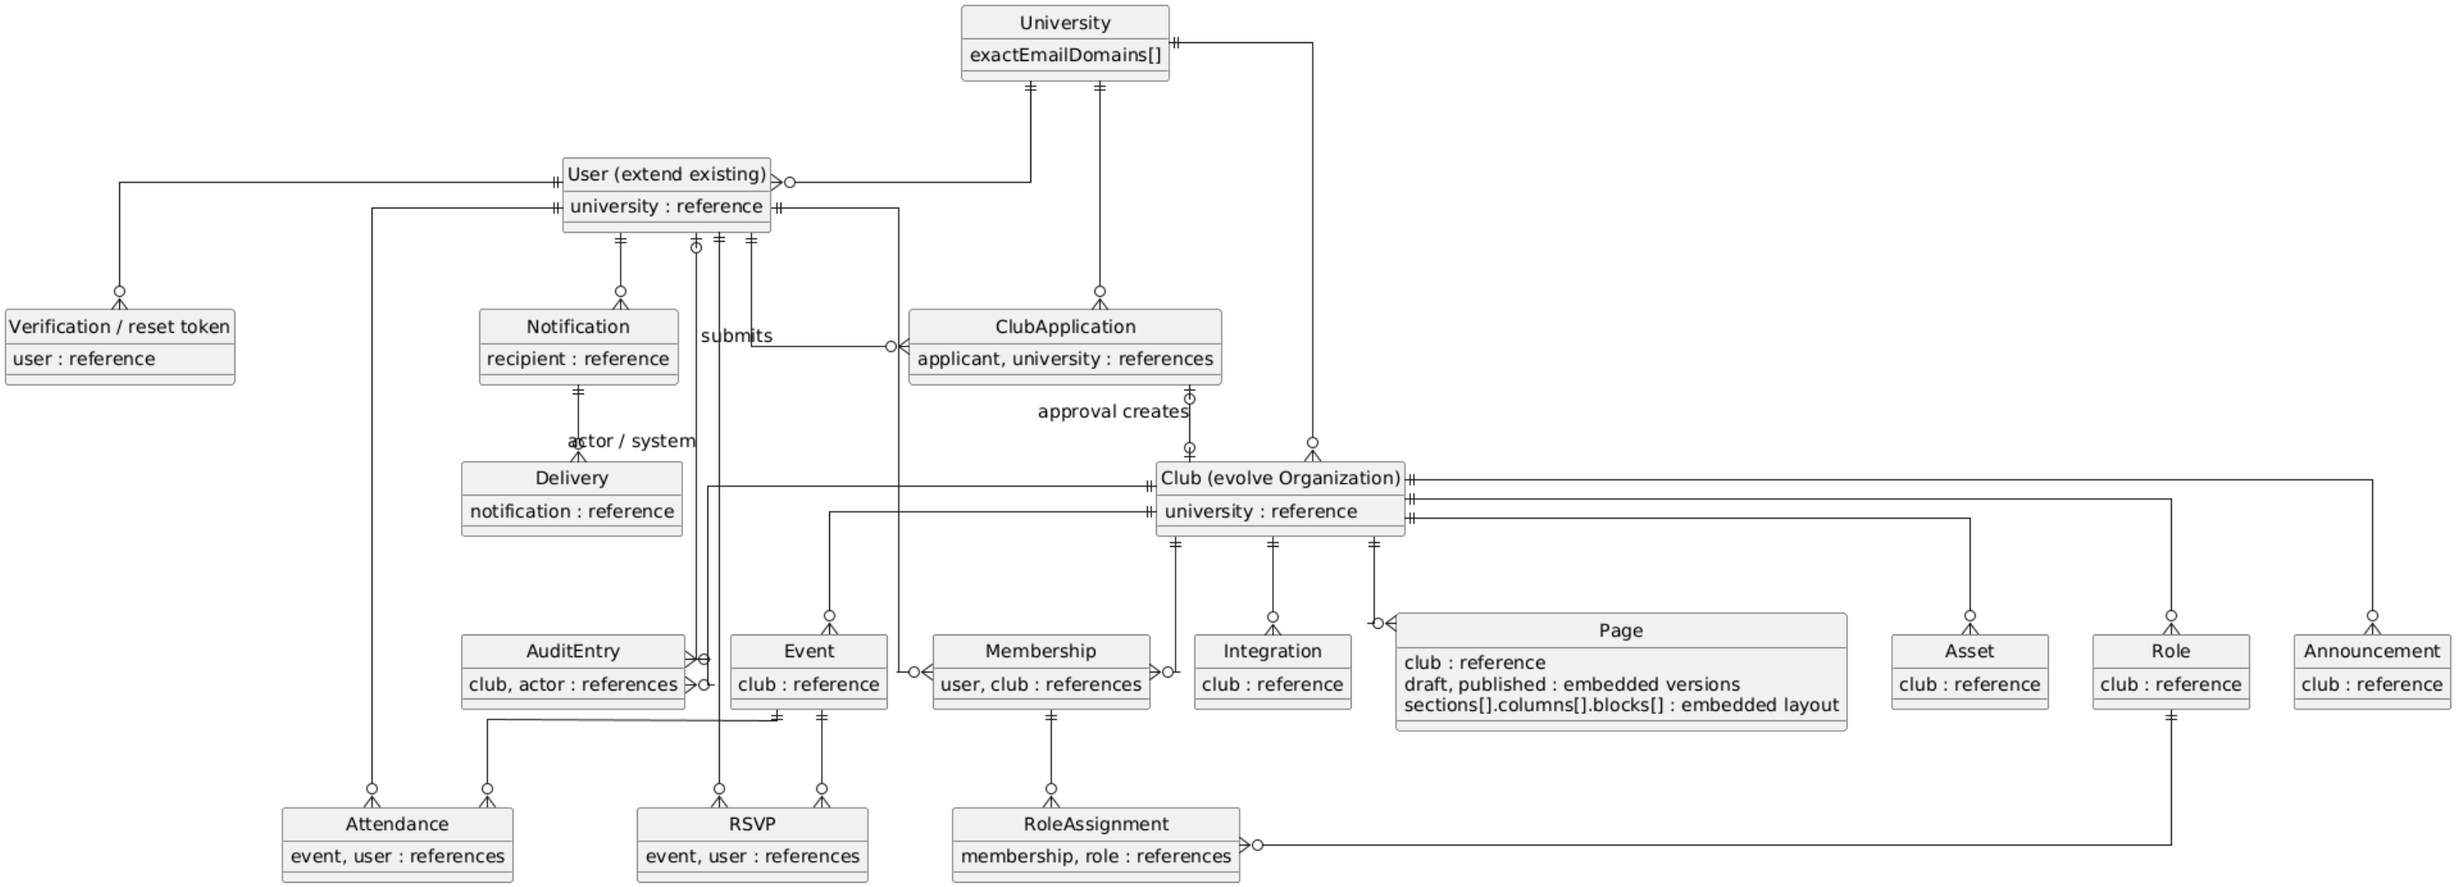

Hilt - presentation delivery plan
Status: 9 November 2026 | Presentation submission due: 20 November 2026

Green: dated evidence. Blue: current local work. Purple: check-in / course deadline.
Orange: proposed schedule with parallel backend, web and mobile work; owners unassigned.
Email setup is targeted for 9-10 November; verification/recovery depend on it.
Deadline source: Course Calendar and instructor announcement of 2 November 2026.
Presenting starts the week of 30 November; Team 2's slot is not yet assigned.
Planned work is not recorded completion. Payment processing remains stretch scope.

Hilt — proposed PRD data relationships
PLANNED · not the implemented database schema

Proposed logical relationships from docs/prd.md; fields and indexes remain to be designed.
References use IDs; only Page layout/version content is proposed as embedded here.
Membership, RSVP, and Attendance remain independent records.
Event blocks reference Event; using a block never duplicates RSVP/Attendance.
Audits must retain recoverable prior state; delivery history survives recovery.
Not a migration or a claim that these collections or APIs exist.
